

COURSE OUTLINE

COURSE: Engine Performance

PROGRAM: 280.C0 Aircraft Maintenance

DISCIPLINE: 280 Aeronautics

WEIGHTING: Theory: 3 Practical Work: 3 Personal Study: 2

Instructor(s)	Office	☎ Extention	✉ Email or Website
Patrick Ladouceur	D-113C	4732	patrick.ladouceur@ena.ca

OFFICE HOURS

	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY

CONTEXT OF THIS COURSE IN THE PROGRAM

The course *Engine Performance* aims to have students:

- Understand the performance of piston and turbine engines to be able to use them within their optimum range of operation.
- Be able to troubleshoot an engine being repaired for reduced performance and compare it to ideal performance.
- Be able to compare the performance of various aircraft with different types of engines.
- Students must keep this course outline for the duration of their studies as it will be useful for the comprehensive assessment at the end of the program.

Transport Canada : This course outline meets the requirements of Training Organisation Certification Manual (MCF) of Transport Canada. The Department applies Transport Canada standard which allows a maximum absence of 5% for the course (theory and laboratory). The department compiles absences of all students enrolled in Aircraft Maintenance (280.C0) according to Transport Canada requirements. The application of Transport Canada policies regarding absences is available on the [Ma réussite à l'ÉNA](#) website under the heading « Privilèges accordés par Transports Canada ».

COMPETENCIES OF THE EXIT PROFILE (STUDENT SKILL PROFILES)

Perform maintenance on engines

MINISTRY OBJECTIVE(S) AND COMPETENCIES

026B To assess the performance of piston and turbine engines.

TERMINAL OBJECTIVE OF THE COURSE

To assess the performances of piston and turbine engines.

TEACHING AND LEARNING STRATEGIES

Theory:

The method, teaching and learning style use standard pedagogical techniques such as:

- formal lectures
- use of model engines
- films
- parts
- Powerpoint notes.

Practical Work:

The method, teaching and learning style use standard pedagogical techniques such as:

- Powerpoint notes
- functioning engines and parts
- Volvo Diesel engine
- Chrysler gas engine
- Rover gas turbine
- SR-30, heat pump

For data reading and for analysis:

- Measuring instruments

Students will perform engine tests in the laboratory.

COURSE PLAN– THEORY

Activity Periods: Throughout the Session

Learning Objective	Content	Personal Study Activities
1. Master simple calculations and units with the ideal gas equation and calculating work.	<ul style="list-style-type: none"> ▪ Basic units used in the international system, their inter-relation and simplification ▪ Association of basic units with their physical concept (for work, Joules). 	

Activity Period: Weeks 6 to 15

Learning Objectives	Content	Personal Study Activities
<p>2.1 Apply the first law of thermodynamics</p> <p>2.2 Make the link between heat and work</p> <p>2.3 Calculate the performance of a heat engine.</p>	<ul style="list-style-type: none"> ▪ Analysis of engine performance using tools (concepts) from thermodynamics such as the first law, the closed system, open system (control volume), the law of conservation of mass, the second law, steady airflow, etc. ▪ Identification and use for purposes of analysis, the following thermodynamic variables: pressure, temperature, density, internal energy, enthalpy, entropy, etc. ▪ Equation of ideal gases, its limitations, and the related notion of mass heat (constant and variable) 	

Activity Periods: Weeks 11 to 15

Learning Objective	Content	Personal Study Activities
<p>3.1 Explain the details related to power cycles.</p> <p>3.2 Compare the performance of various aircraft with different types of engines.</p>	Principles of the following cycles: Carnot, Brayton, turbojet, turboprop, turbo fan, geared fan, and their variations (regenerator, post-combustion)	

COURSE PLAN – PRACTICAL WORK

Activity Periods: Throughout the Session

Learning Objectives	Content	Personal Study Activities
<p>1.1 Define the characteristic curves of various engines: diesel, gasoline and turbine.</p> <p>1.2 Use a variety of measuring instruments.</p>	<ul style="list-style-type: none"> ▪ Using instruments such as the dynamometer, pressure gauge and densimeter, calculate torque, power, fuel flow, air flow, specific fuel consumption and the fuel/air ratio. 	
<p>2.1 Demonstrate the various principles of a cooling/heating system.</p> <p>2.2 Be able to perform certain energy exchange calculations. (Be able to calculate energy exchange.)</p>	<ul style="list-style-type: none"> ▪ Using pressure and temperature measurements, calculate heat exchange and the performance coefficient. 	
<p>3. Study the effect of fuel/air mixture in a piston engine.</p>	<ul style="list-style-type: none"> ▪ Calculating the theoretical fuel/air mixture. ▪ Measuring and calculating the effects of a different mixture on the exhaust temperature, torque, power and specific fuel consumption. 	
<p>4. Establish energy balances of various piston and turbine engines.</p>	<ul style="list-style-type: none"> ▪ Measuring and calculating the distribution of fuel energy in an engine. 	
<p>5. Calculate the performance of various turbine engine components.</p>	<ul style="list-style-type: none"> ▪ Measuring and calculating the power received or produced and the performance of each component, the overall engine thrust. 	

SYNTHESIS OF EVALUATION METHODS

Theory

Description of the Evaluation Activity	Context	Learning Objective(s)	Evaluation Criteria	Due Date (date assignment is due or exam date)	Weighting (%)
Performance Analysis of piston engines and turbines	3 period Individual written exam, with calculator.	1 and 2	Precision of calculations. Compliance of units. Accurate analysis of engine performance.	Week 7	20%
Performance Analysis of piston engines and turbines	3 period Individual written exam, with calculator.	all	Precision of calculations. Compliance of units. Accurate analysis of engine performance.	Week 15	30%

Sub-total: 50%

Practical Work

Description of the Evaluation Activity	Context	Learning Objective(s)	Evaluation Criteria	Due Date (date assignment is due or exam date)	Weighting (%)
Performance Analysis of piston engines and turbines	3 period Individual written exam, with calculator	1, 2	Precision of calculations. Compliance of units. Accurate analysis of engine performance.	Week 5	15%
Performance Analysis of piston engines and turbines	3 period Individual written exam, with calculator	1, 2,	Precision of calculations. Compliance of units. Accurate analysis of engine performance.	Week 10	15%
Performance Analysis of piston engines and turbines	3 period Individual written exam, with calculator	3, 4, 5	Precision of calculations. Compliance of units. Accurate analysis of engine performance.	Week 15	20%

Sub-total: 50%

TOTAL: 100%

SCHEDULE OF THEORY AND PRACTICE COURSES

Wk	Theory 3 hours	Practice 3 hours
1	Introduction to thermodynamics	Introduction to engine performances
2	Perfect gas law	Volvo diesel engine performances
3	Power correction Power curves of piston engines	Chrysler gasoline engine performances
4	Heat	SR-30 Jet fuel engine performances
5	Work	Exam 15%
6	First law closed system	Piston vs Avgas engine performances
7	Exam 20%	Air/Fuel mixture on Chrysler engine
8	Turboprop performances	Energy balance on a Chrysler engine
9	Turbofan Performances	Thermopump principles
10	First law open system	Exam 15%
11	Engine efficiency	JT-8 performances / Case study
12	2 ^e Law of thermodynamics	Rover turboshaft engine performances
13	ECTM performance analysis	Volkswagen engine performances
14	ECTM performance analysis	Thrust and traction / Performance calculations
15	Final Exam 30%	Final Exam 20%

The periods of the activities listed in the training plans of the propulsion department are indicative only. Changes could be made to these periods to accommodate logistics issues.

REQUIRED MATERIAL

SHARP EL 531 calculator.

REQUIREMENTS TO PASS THE COURSE

1. Passing Mark

The passing mark for this course is 60% by adding the marks for the theory and practical work for the course.

2. Tardiness

Students who arrive late after the beginning of the first period of a course are considered absent for this period.

3. Attendance for Summative Evaluations

Students must be present for summative evaluations and must comply with the instructions given by the instructor to carry out the evaluation activity and written in the course outline. Unexcused tardiness for a summative evaluation could result in being excluded from the activity. Any absence from a summative evaluation that is not due to serious reasons (illness, death in the family, etc.) could result in a mark of zero (0) for the activity.

Students are responsible for meeting with the instructor before an evaluation activity is held or immediately upon returning to ENA to explain the reason for an absence. Proper documentation, such as a medical certificate, a death certificate, legal papers, etc., must be shown if the reason for absence is serious and recognized as such by the instructor(s), arrangements will be made between the instructor(s) and the student to make up the activity.

4. Submitting Assignments

All assignments must be submitted by the date, hour and location designated by the instructor(s). Late assignments will be penalized 10% per day that they are late and will receive a mark of zero (0) after one week.

METHODS OF COURSE PARTICIPATION

Workclothes (ENA)
Safety glasses
Safety shoes

OTHER DEPARTMENTAL REGULATIONS

Students are encouraged to consult the website for the specific regulations for this course:
<http://guideena-en.cegepmontpetit.ca/department-rules/>
<https://mareussite.cegepmontpetit.ca/ena/mon-parcours/mon-programme/regles-departementales>

INSTITUTIONAL POLICIES AND REGULATIONS

All students enrolled at cégep Édouard-Montpetit must become familiar with and comply with the institutional policies and regulations. In particular, these policies address learning evaluations, maintaining admission status, French language policies, maintaining a violence-free and harassment-free environment, and procedures regarding student complaints. The French titles for the policies are: *Politique institutionnelle d'évaluation des apprentissages, les conditions particulières concernant le maintien de l'admission d'un étudiant, la Politique de valorisation de la langue française, la Politique pour un milieu d'études et de travail exempt de harcèlement et de violence, les procédures et règles concernant le traitement des plaintes étudiantes.*

The full text of these policies and regulations is accessible on the Cégep web site at the following address: <http://ena.cegepmontpetit.ca/l-ecole/reglements-et-politiques>. If there is a disparity between shortened versions of the text and the full text, the full text will be applied and will be considered the official version for legal purposes.

NOTE: This Course Outline is a translation of the *Plan de cours* for 280-526-EM: *Analyse de performances aux bancs d'essais*. If there is a discrepancy, then the original French version will be considered the official version for legal purposes.

THE CENTRE FOR ADAPTED SERVICES - FOR STUDENTS WITH DISABILITIES

Students having received a professional diagnosis of impairment (motor skills, neurological, organic, sensory, learning difficulties, mental health, autism spectrum disorder or other) or suffering from a temporary medical condition may request special accommodations.

Students seeking these accommodations must forward their diagnosis to the CSA by either MIO to "Service, CSA-ENA" or email to "servicesadaptesesena@cegepmontpetit.ca".

Students already registered with the CSA must communicate with their teachers at the beginning of the semester to discuss those accommodations they have been awarded by the CSA.
